Subject Index of Volume 146

Abrasion
abrasive wear of silicon carbide particulate- and whisker-reinforced 7091 aluminum matrix composites, 337
effects of filler particles on abrasive wear of elastomer-based composites 349
review of test methods for abrasive wear in orė grinding, 389
Additives
EP activity evaluation of tris(*N*-arylthiosemicarbazido) molybdenum(III) on steel balls in a four-ball test, 313
Alloys
frictional behavior of non-equilibrium Cu–Pb alloys, 241
sliding wear characteristics of non-equilibrium Cu–Pb alloys, 257
water jet erosion behaviour of Ti–Ni binary alloys, 219
Alumina
effects of surrounding atmosphere on the wear of sintered alumina, 179
Aluminium
effect of surface roughness on friction and metal transfer in lubricated sliding of aluminium alloys against steel surfaces, 37
Aluminium composites
abrasive wear of silicon carbide particulate- and whisker-reinforced 7091 aluminum matrix composites, 337
Antioxidants
improvement of lubrication breakdown behaviour of isogeometrical phosphorus compounds by antioxidants, 25
Automotive brakes
role of friction film in friction, wear and noise of automotive brakes, 89

Chromium
effects of nitrogen ion implantation on tribological properties of metallic surfaces, 1
Contact
investigation of crack propagation during contact by a finite element method, 229
Contact pressure
effects of work hardening on the contact pressure and the deflection of asperity points in contact, 325
Copper
frictional behavior of non-equilibrium Cu–Pb alloys, 241
sliding wear characteristics of non-equilibrium Cu–Pb alloys, 257
Crack propagation
investigation of crack propagation during contact by a finite element method, 229
Cutting conditions
effect of cutting conditions on dynamic properties and surface integrity of work material, 301

Deflection
effects of work hardening on the contact pressure and the deflection of asperity points in contact, 325
Deformation
role of subsurface deformation and strain localization on the sliding wear behaviour of laminated composites, 285
Dialkyl 3,5-di-*t*-butyl 4-hydroxy benzyl phosphonate
mechanism of action and performance of dialkyl 3,5-di-*t*-butyl 4-hydroxy benzyl phosphonates as a new anti-wear additives, 63
Dynamic interactions
detection of asperity dynamic impacts on lightly loaded random surfaces, 377
Dynamic performance
effects of fluid compressibility on the dynamic response of hydrostatic journal bearings, 269
Dynamic properties
effect of cutting conditions on dynamic properties and surface integrity of work material, 301

Elsevier Sequoia/Printed in The Netherlands

Elastic–plastic contacts
elastic–plastic model for the contact of anisotropic rough surfaces, 201
Elastohydrodynamic lubrication
theory, holographic photoelastic experiment and application of elasto-hydrostatic lubrication, 99
Extreme pressure–antiwear additives
diffusion of extreme pressure–antiwear additives in oil measured by holographic interferometry, 79
improvement of lubrication breakdown behaviour of isogeometrical phosphorus compounds by antioxidants, 25
mechanism of action and performance of dialkyl 3,5-di-*t*-butyl 4-hydroxy benzyl phosphonates as a new anti-wear additive, 63

Fillers
effects of filler particles on abrasive wear of elastomer-based composites, 349
Film transfer
effect of temperature on the transfer film formation in sliding contact of PTFE with stainless steel, 367
Fluid compressibility
effect of fluid compressibility on the dynamic response of hydrostatic journal bearings, 269
Four-ball tests
EP activity evaluation of tris(*N*-aryl-thiosemicarbazido) molybdenum(III) on steel balls in a four-ball test, 313
Friction
effects of surface roughness on friction and metal transfer in lubricated sliding of aluminium alloys against steel surfaces, 37
frictional behavior of non-equilibrium Cu–Pb alloys, 241
role of friction film in friction, wear and noise of automotive brakes, 89

Hydrodynamic slider bearing
the effects of rheological characteristics of the lubricant and surface roughness on the load capacity of a hydrodynamic slider bearing, 165
Hydrostatic bearings
effects of fluid compressibility on the dynamic response of hydrostatic journal bearings, 269
theory, holographic photoelastic experiment and application of elasto-hydrostatic lubrication, 99

Interferometry
diffusion of extreme pressure–antiwear additives in oil measured by holographic interferometry, 79
Iron
effects of nitrogen ion implantation on tribological properties of metallic surfaces, 1

Laminates
role of subsurface deformation and strain localization on the sliding wear behaviour of laminated composites, 285
Lead
frictional behavior of non-equilibrium Cu–Pb alloys, 241
sliding wear characteristics of non-equilibrium Cu–Pb alloys, 257
Load capacity
effects of rheological characteristics of the lubricant and surface roughness on the load capacity of a hydrodynamic slider bearing, 165
Lubrication
effects of rheological characteristics of the lubricant and surface roughness on the load capacity of a hydrodynamic slider bearing, 165
EP activity evaluation of tris(*N*-arylthiosemicarbazido) molybdenum(III) on steel balls in a four-ball test, 313
high resolution transmission electron microscope observation of stacking faults of molybdenum disulphide in relation to lubrication, 107
improvement of lubrication breakdown behaviour of isogeometrical phosphorus compounds by antioxidants, 25

Molybdenum
effects of nitrogen ion implantation on tribological properties of metallic surfaces, 1

Molybdenum disulphide
high resolution transmission electron microscope observation of stacking faults of molybdenum disulphide in relation to lubrication, 107

Nickel
water jet erosion behaviour of Ti–Ni binary alloys, 219
Nitrogen implantation
effects of nitrogen ion implantation on tribological properties of metallic surfaces, 1

Oil journal bearings
stability of submerged oil journal bearings under dynamic load, 125
Ore grinding
review of test methods for abrasive wear in ore grinding, 389

Phosphorus
improvement of lubrication breakdown behaviour of isogeometrical phosphorus compounds by antioxidants, 25
Photoelasticity
theory, holographic photoelastic experiment and application of elastohydrostatic lubrication, 99
Polytetrafluoroethylene
effect of temperature on the transfer film formation in sliding contact of PTFE with stainless steel, 367
Profilometer
computer vision profilometer: equipment and evaluation of measurements, 53

Random surfaces
detection of asperity dynamic impacts on lightly loaded random surfaces, 377
Relative humidity
effects of surrounding atmosphere on the wear of sintered alumina, 179
Rolling
tribological behavior of steel rollers under rolling–sliding contacts, 149
Rotary ferrographic analyzer
study of wear particle deposition by an improved rotary ferrographic analyzer, 137

Rough surfaces
elastic–plastic model for the contact of anisotropic rough surfaces, 201
Roughness
computer vision profilometer: equipment and evaluation of measurements, 53
Rubbers
effects of filler particles on abrasive wear of elastomer-based composites, 349

Silicon carbide
abrasive wear of silicon carbide particulate- and whisker-reinforced 7091 aluminum matrix composites, 337
Sliding
effects of surface roughness on friction and metal transfer in lubricated sliding of aluminium alloys against steel surfaces, 37
effects of surrounding atmosphere on the wear of sintered alumina, 179
role of subsurface deformation and strain localization on the sliding wear behaviour of laminated composites, 285
sliding wear characteristics of non-equilibrium Cu–Pb alloys, 257
tribological behavior of steel rollers under rolling–sliding contacts, 149
Stability
stability of submerged oil journal bearings under dynamic load, 125
Stainless steel
effect of temperature on the transfer film formation in sliding contact of PTFE with stainless steel, 367
effects of work hardening on the contact pressure and the deflection of asperity points in contact, 325
Steel
effects of surface roughness on friction and metal transfer in lubricated sliding of aluminium alloys against steel surfaces, 37
tribological behavior of steel rollers under rolling–sliding contacts, 149
Strain localization
role of subsurface deformation and strain localization on the sliding wear behaviour of laminated composites, 285

Stress analysis
investigation of crack propagation during contact by a finite element method, 229
Structural vibration
detection of asperity dynamic impacts on lightly loaded random surfaces, 377
Surface integrity
effect of cutting conditions on dynamic properties and surface integrity of work material, 301
Surface roughness
effects of rheological characteristics of the lubricant and surface roughness on the load capacity of a hydrodynamic slider bearing, 165
effects of surface roughness on friction and metal transfer in lubricated sliding of aluminium alloys against steel surfaces, 37

Titanium
water jet erosion behaviour of Ti–Ni binary alloys, 219
Tris(*N*-arylthiosemicarbazido) molybdenum-(III)
EP activity evaluation of tris(*N*-arylthiosemicarbazido) molybdenum(III) on steel balls in a four-ball test, 313

Water erosion
water jet erosion behaviour of Ti–Ni binary alloys, 219
Wear
review of test methods for abrasive wear in ore grinding, 389
sliding wear characteristics of non-equilibrium Cu–Pb alloys, 257
study of wear particle deposition by an improved rotary ferrographic analyzer, 137
Work hardening
effects of work hardening on the contact pressure and the deflection of asperity points in contact, 325
